Water is life!

ABOUT US

Our company was founded in 1997 and since then we are constantly developing in manufacturing and trading a large portfolio of chemical products for potable and wastewater treatment. Our factory area covers 30,000 square meters and has more than 100 employees.

We provide expertise, application know-how and chemicals that benefit our customers by optimizing product quality and yield, enhancing process and energy efficiency, and ensuring that water quality meets end-use specifications and regulatory requirements.

kemcristal

We produce and commercialize all types of chemicals for water industry

Drinking water

Municipal wastewater

Industrial wastewater

kemcrystal

Our main products!

- **Coagulants:**

- ❖ polyaluminum chloride;
- ❖ aluminum sulfate (liquid/solid);
- ❖ ferric sulphate (min.42%);
- ❖ ferric chloride (min.42%);

Our main products!

- **Polymers:**

Our polymers are available in solid, emulsion and liquid forms.

- ❖ **anionic (powder/emulsion)**
- ❖ **cationic (powder/emulsion)**

Our main products!

- **Foam control - Defoaming**

- ❖ oil based defoamers
- ❖ water based defoamers

Applications:

- ✓ industrial wastewater
- ✓ biogas production
- ✓ municipal wastewater
- ✓ oil field
- ✓ textiles

Other chemicals

- **Technical sulfuric acid (min. 96%)**
- **Sodium hydroxide solution (min. 48%)**
- **Hydrochloric acid (min. 32%)**
- **Sodium hypochlorite (min. 12,5%)**

Logistics

Kemcrystal wants to ensure a safe and responsible supply chain from start-to-end: from making the product to the final delivery to our customers.

We own 15 tank containers for chemicals transportation and 5 trucks with open platform. For smaller quantities, we can provide intermediate bulk containers (IBCs) which are an ideal alternative between a drum and a tanker to transport liquid products.

The transportation of chemical products is provided in accordance to international environmental standards and legislation.

In a fast-paced world with high industry growth, **Kemcrystal** meets customer's needs and helps protect the environment through professionalism, dedication and direct involvement.

Our areas of expertise are pulp & paper, water intensive industries & municipal water treatment, and oil & gas.

We can provide expertise as short-term or long-term technical assistance, offering solutions for optimizing the chemicals consumption.

Thank you for your attention !
